Features and Benefits

LGA775 Pentium® D & Pentium® 4 Processor with HT Technology Supported

Supports Intel® Pentium® D processor, Intel® Pentium® 4 Processor with HT Technology and all other Intel® Pentium processors and Intel® Celeron® processors in the LGA775 socket, with scalability for future processor innovations.

VIA® P4M890 Chipset and VT8237R Chipset deliver the Reliability and I/O Flexibility

By harnessing the advanced VIA StepUp memory controller technology, motherboards based on the VIA P4M890 can support either DDR or DDR2 memory modules on the same motherboard, providing users the flexibility to use whatever memory standard best suits their requirements. The VIA P4M890 features a high bandwidth V-Link bus to allow communication between the chipset's North and South bridges at 533MB/sec. When combined with solutions such as the market-leading VIA VT8237R South Bridge and a broad array of VIA companion chips, the VIA P4M890 provides a comprehensive range of storage, multimedia and connectivity features, including native Serial ATA with RAID functions, 6-channel Audio, 10 / 100 Ethernet, and USB2.0.

Advanced Memory Controller

VIA's acclaimed FastStream64 memory controller enables lightning fast memory access speeds and optimal system performance, supporting up to 2GB of DDR2 533, 400 memory DIMMs at P4M890DMP motherboard delivered by Jetway.

Pro Magic Plus System Recovery Software Embedded

It provides complete system protection for your computer, no matter whether it is virus infection, system disorder or confusion, or data damage. Restore important data back right away, allowing your system to be operated under a safe environment. This amazing software not only provides convenient instant restoration, but also brings data back to the preferred state at any specific time point as you wish. Moreover, it combines several other functions such as anti-virus, backup software, uninstall software, multi-booting etc. to satisfy your needs of all sorts of system protections. No more worries on new virus or system failure.

Image IT System Back-up Software Embedded

Image It can help you backup the whole system and data, and restore them instantly whenever the data on HD is destroyed, or even the HD partitions have been lost. You can also record the image file on a CD, and restore your system in an easily way. You needn't worry about the complex instruction.
